

The Pharmacosmos Therapeutics (PTI) Clinical Nurse Liaison (CNL) team can provide unbranded disease state education on relevant topics to healthcare professionals. Please see the available programs listed below and contact your PTI CNL for more information, and to schedule a presentation. These educational presentations are designed to be delivered, either virtually or in-person.

Please note these presentations do not qualify for CME credits.

IRON DEFICIENCY ANEMIA

Overview of Infusion Reactions: Focus on Intravenous (IV) Iron

- Overview and management of infusion reactions including hypersensitivity

Overview of Iron Physiology and Anemia

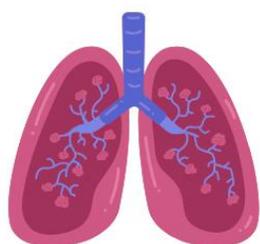

- Physiology basics (erythropoiesis and iron metabolism)
- Anemia and iron deficiency anemia (IDA)

Core Deck

- Brief overview of IDA – symptoms, diagnosis, treatment
- Review of the most current IV iron available in the US (efficacy and safety)

IV Iron Induced Hypophosphatemia

- Introduction to safety of IV iron
- What is hypophosphatemia? Causes, signs & symptoms, and mechanism of action

LUNG CANCER

Mitigating, Monitoring, and Managing - Chemotherapy Induced Myelosuppression

- Overview of chemotherapy-induced myelosuppression (CIM)
- Incidence, risk factors, diagnosis, and potential consequences of CIM
- Current treatment landscape for CIM and health economics in CIM

Oncologic Emergencies Common in Lung Cancer

- Superior vena cava (SVC) syndrome
- Malignant spinal cord compression (SCC)
- Paraneoplastic syndromes (PNS)
- Syndrome of inappropriate antidiuretic hormone (SIADH)

Lung Cancer – Focus on Extensive Stage Small Cell Lung Cancer (ES-SCLC)

- Overview of lung cancer and SCLC – Incidence and prognosis
- Current treatment options for ES-SCLC
